Group leader position in Stuttgart

29. Januar 2016

Dear Colleagues,

We are looking for an excellent postdoctoral scientist to head our research on

Optics of Nanostructures.

The outstanding candidate should have a PhD degree in physics and ideally about two years post-doc experience in an experimental or theoretical group dealing with optical investigations of nanostructures, metamaterials, metallic particles, or surfaces. We envision an ambitious self-motivated scientist that is able to establish an independent research group.

In return we provide excellent research conditions, a lively and active environment for discussions and collaborations in one of the best places for optics and solid-state science. We support the acquisition of additional funding and the application for fellowships and other grants. The contract can start at any time and first will be limited to two year; it may be extended when successful.

If you do know a suitable candidate, please forward this request to him/her, or identify him/her to me.

More information can be found on our homepage
